

Travis County ARES - Whole house generator presentation

Written by Administrator - Last Updated Saturday, 21 July 2012 22:15

This is an update of the station emergency power series by Lew Thompson, W5IFQ/AAA6TX. In this section, Lew covers his replacement of the generator with a whole-house power solution. The fuel is now Natural Gas and full details of cost, the process and the installation are included. It is a 1.4mb .pdf and may be downloaded [here](#) .
