

Travis County ARES - Arches Sites Map

Written by Rick Kirchhof - NG5V - Last Updated Thursday, 06 February 2014 21:27

Here is a map of each ARCHES site. Some are primary care hospitals, others are smaller hospitals or regional medical clinics.

You can easily obtain directions to a site by first locating it, then clicking on the bubble on the map or the site name from list on the left. Click on "directions" inside the pop-up window and then insert your current location to get distance and drive-to instructions from your current location.

If you don't like the route Google chooses, click and drag the highlighted route to your desired road. You might have to click and drag multiple places to develop a final route that chooses/avoids the proper roads.

Here is the [Google Map of ARCHES sites](#) .
